Frameworks & Libraries	React.js, Node.js, Express.js, Redux, Bootstrap
Database	SQL, MongoDB
Tools	Postman, JIRA, Git, GitHub, REST API
Soft Skills	Collaboration, Problem-solving, Communication, Time management, Result-oriented

EXPERIENCE

Software Developer   Dec 2024 - Present
CodeMentees   *Bengaluru, IN*

- Optimized APIs using Node.js, reducing latency by 30 percent ensuring seamless MongoDB integration for a dynamic client landing page.
- Led a team of 5 to deliver client-tailored solutions.

Backend Developer   Feb 2024 - Nov 2024
Quite Paper   *Remote, IN*

- Designed and implemented a scalable library management system with seat booking, CRM modules, and real-time notifications, including an automatic seat allotment algorithm that reduced booking conflicts by 30 percent.
- Integrated a secure payment gateway for 500+ daily users, deployed the platform on Render with 99.9 uptime, and delivered 10+ new features to enhance usability and engagement.

Full Stack Developer - MERN   Aug 2023 - Jan 2024
Unizone.io   *Chandigarh, IN*

- Developed a student management system using Node.js and MongoDB, enabling student enrollment, fee tracking, and course management, with integration for uploading and categorizing audio, PDFs, and text modules.
- Focused on UI/UX design and robust backend development.
- Managed tasks and tracked progress using Zira, leveraging Agile methodologies to ensure efficient project delivery.

PROJECTS

Jobgram: A MERN-based platform enabling job seekers to find and apply for jobs posted by employers.

MERN EState: Built a real estate platform facilitating property, with advanced search and user authentication.

MERN Blog: A blogging platform developed with MERN, allowing users to create, edit, and manage blog posts.
